

Jeffrey Vos

Front-End Facing Full Stack Engineer / Native iOS & Android Engineer

+31 6 23539611

jeffreyvos2000@gmail.com

Apeldoorn, Netherlands

PROFILE

Front-end facing Full Stack engineer with 3+ years of professional experience building SaaS platforms, websites, mobile apps, and lead generation systems. Comfortable across the full stack of modern web tools, from Vue and React applications to WordPress, Webflow, Framer, as well as GoHighLevel.

Founder of NYX Digital, a lead management agency for local trades businesses.

EXPERIENCE

Founder & Developer — NYX Digital

2026 – Present • nyx.digital

- Building and running a lead management agency for trades businesses (plumbers, electricians, builders)
- Designs, builds, and manages full GHL-powered CRM and automation systems for clients
- Services include missed call text-back, automated follow-up sequences, appointment booking, inbox management, and local SEO
- Built the agency website from scratch using Astro

Front-End Developer — Vitron

Sep 2023 – Nov 2025

- Built and maintained internal and external SaaS web applications using Vue 3, TypeScript, Tailwind CSS, and Vite
- Developed role and permission-based UI systems for an enterprise hospitality platform with daily active users
- Integrated multiple third-party APIs for task workflows, reports, and two-way data updates
- Optimized performance through caching, lazy loading, and pagination
- Mentored interns and reviewed code across the team

Intake — AI Calorie & Habit Tracker

2025 – Present • getintake.app

- Mobile app built with React Native (Expo), currently pre-launch with an active waitlist; marketing site on Next.js / Vercel
- AI identifies ingredients, portions, and calories automatically from a photo

CLIENT PROJECTS

Mandarin Laundry — Business Website

2026 • mandarinlaundry.com

- WordPress/Elementor site for a laundry business in Oban, Scotland
- Online hotel pickup order form with payment, pricing tables, reviews, and contact
- Built a custom Cloudflare Worker automation that captures form submissions, logs orders to Notion, and processes payments through Stripe
- Full serverless backend — no plugins, no third-party form tools, custom built from scratch
- Live and actively taking customer orders

Mandarin Thai Cuisine — Restaurant Website

2026 • mandarinthai.food

- WordPress/Elementor site for a Thai restaurant in Oban, Scotland
- Full dinner menu and takeaway menu pages, photo gallery, and location info
- Online table booking integration via easyTable, WhatsApp takeaway ordering

Natas Fotografie — Photography Studio

2025 • natasfotografie.nl

- Full multi-page photography portfolio site in Dutch for a professional photographer in Apeldoorn
- Services: portrait, family, couples, baby, and pet photography
- Portfolio gallery, individual service pages, FAQ, WhatsApp booking flow
- Built with Vue/Nuxt, deployed on Vercel

Rocky's Cafe — Business Website

2026 • rockys-cafe.vercel.app

- Cinematic animation-driven site using Nuxt.js and GSAP — custom scroll animations and transitions

Personal Portfolio

2025 – Present • jjlvos.com

- Self-designed and built personal portfolio showcasing selected projects and technical focus areas
- Cinematic UI with custom animations — built with Vue/Nuxt and GSAP
